SUMMARY

Software Engineer I at Mekari, maintaining 25+ microservices for a SaaS no-code platform at 99.9% system reliability and a 0% change failure rate. Bachelor's in Information and System Technology from Bandung Institute of Technology (ITB), Summa Cum Laude, GPA 3.85/4.00. Full-stack experience across backend, web, mobile, and IoT, with four competition placements, including two first-place wins.

EXPERIENCE

Software Engineer I Jan 2026 – Present
Mekari | Hybrid

- Developed and maintained 25+ microservices for Mekari's no-code platform, used by both single-tenant and multi-tenant clients, covering the report feature, the plugin feature, and cross-product API integrations, ensuring 99.9% system reliability and 100% technical documentation coverage.
- Directed end-to-end engineering initiatives as Project In Charge (PIC), from authoring RFCs and challenging product scope to execution, achieving a 0% Change Failure Rate (CFR) and zero major bugs (P0/P1) leaked to staging or production, with ≥90% coverage for unit and SUT tests.
- Accelerated the SDLC by 10x by pioneering AI-assisted workflows across ATDD, automated testing, troubleshooting, and PRD/RFC reviews, maintaining an 80% AI-assisted PR completion rate.
- Upskilled the engineering team by leading technical sharing sessions on emerging AI methodologies.
- Sustained delivery averaging 19+ story points per sprint (25% above the engineering baseline) with under 10% ticket carryover and a median lead time for change of under 3 days.
- Achieved a 100% SLA fulfillment rate during on-call rotations by resolving P0 incidents within 30 minutes and P1s within the same day, with a Mean Time to Acknowledge (MTTA) of under 60 seconds for high-urgency PagerDuty alerts, followed by Root Cause Analysis (RCA) to prevent recurrences.
- Engineered backend services in Go (Golang) and PHP on a microservices architecture, alongside a Vue and TypeScript frontend.

Fullstack Engineer Associate Oct 2025 – Dec 2025
KPMG Siddharta Advisory | Jakarta, Indonesia

- Developed a Financial Risk Management tool that automates Expected Credit Loss (ECL) calculations, enabling clients to achieve full compliance with PSAK 109 standards.
- Delivered the tool as a Fullstack Engineer Associate within a three-month engagement, turning ECL calculation into an automated process for clients that need to meet PSAK 109 requirements, with an Indonesia Stock Exchange-listed multifinance company as the main client.

Software Engineer Intern Feb 2025 – Apr 2025
Paper.id | Remote

- Developed the VA BCA Open Amount feature and contributed across the full development lifecycle, including System Integration Testing (SIT) and User Acceptance Testing (UAT).
- Delivered customized software solutions for enterprise clients in the Medium-Large Enterprise (MLE) business unit of Paper.id, a B2B invoicing and payments platform serving 600,000+ businesses, aligning features with specific client needs.
- Translated individual enterprise client requirements into working features, validating each through SIT and UAT.

Analyst Sep 2024 – Dec 2024
Central Bank of Indonesia (KMBI Program, Payment System Department, Yogyakarta Representative Office) | Yogyakarta, Indonesia

- Led development of the Bregada: Non-Cash Payment System Performance Website Dashboard, tracking non-cash payment activities and supporting the monitoring of electronification in 6 regional governments in DIY.
- Gained in-depth knowledge of central banking and payment systems, including AI and blockchain applications in payment systems.

Software Engineer Intern (Corporate Digital Technology) Jan 2024 – Sep 2024
PT Kalbe Farma Tbk | Hybrid

- Developed VisionX, a platform covering Patent Information, Technical Papers, PACS Software, DICOM Viewer, AI for Medical Imaging, and Radiogenomics.
- Implemented a jBPM-based workflow platform to enhance operational efficiency and streamline processes.

Software Engineer Intern Jun 2023 – Dec 2023
PLN Icon Plus | Hybrid

- Developed a website and mobile application for preventive maintenance (PM), with real-time data display and updates for Icon assets.

IT Manager Apr 2023 – Oct 2023
Ganesha Student Innovation Summit | Bandung, Indonesia

- Managed IT infrastructure and technical requirements across 15 divisions, and led website design and development projects serving over 500 participants.

AWARDS

Top 9, Huawei Developer Competition 2024, Asia Pacific Enterprise Track 2024

- Competed as a finalist out of 220 teams with I-BAMS, a smart building system using cloud, AI, and IoT for centralized control, predictive analytics, and energy optimization. Pitch deck

First Winner, Hackathon FindIT 2024, Gadjah Mada University 2024

- Developed Kiddy, a real-time baby and toddler monitoring system with AI machine learning and IoT-driven solutions, using ESP32, NodeJS, Docker, Flutter, WebSockets, and Firebase. Repository

First Winner, Digihatch: Dexa Group Hackathon Competition 2023

- Developed MediGuard, a pharmaceutical logistics solution with website monitoring, IoT, and driver mobile apps for safety and real-time tracking, using ESP32, NodeJS, Azure VM, MongoDB, React, Flutter, WebSocket, and MQTT. Repository

Third Winner, Youth Economic Leadership Program 2024, Central Bank of Indonesia 2024

- Ideated BI-Trade Repository, which automates money market data processing and incorporates an AI-based early warning system to ensure compliance with quotation obligations, ranking Top 3 from 30 Groups with 153 participants. Proposal

PROJECTS

Gen-S Mobile Application 2023

- Developed Gen-S, an audio app for Islamic stories with Images, Playlists, and Galleries, using Flutter with provider state management and Laravel with MySQL for the backend. Play Store | App Store

ITB Tracer Study Website 2024

- Created responsive interfaces and API backend servers using React and Golang for a website that dynamically displays the results of ITB's tracer study research, with landing pages and a CMS dashboard.

Carporteuro Website 2024

- Built a website to manage and reserve workshops, with user account management, scheduling, and history services, using Next.js (TypeScript) and Golang. Site

EDUCATION

Bandung Institute of Technology (ITB) 2021 – 2025
Bachelor's degree, Information and System Technology

- GPA: 3.85/4.00 (Summa Cum Laude)
- Final Thesis: Generator Flight Plan Track Module on Cloud-Based Air Situation Display
- Relevant Coursework: Software Engineering, Backend Developer, Frontend Developer, Mobile Developer, Cloud Computing, Database Management and Modelling, Embedded Systems, Enterprise Architecture and Analysis

SKILLS

Programming Languages: Go, TypeScript, JavaScript, Python, Java, Dart, PHP, C, C++, Kotlin, Haskell
Frameworks and Libraries: Vue, Next.js, React, NodeJS, Flutter, React Native, Laravel, Redux, MUI, Pandas, Supabase, Firebase
Databases and Messaging: PostgreSQL, MySQL, MariaDB, MongoDB, ArangoDB, Redis, RabbitMQ
Protocols: MQTT, WebSocket
Cloud: AWS, GCP, Azure
DevOps and SRE: Docker, Kubernetes, Prometheus, Grafana, Datadog, PagerDuty, incident management and on-call
Tools: Git, Postman, Jira, Trello
Business Intelligence: Tableau, Power BI
Languages: Indonesian, English (professional working proficiency)
